An e-commerce business is a business that buys and sells goods and services online. It can be a business that sells exclusively online or uses e-commerce to supplement other distribution channels.

How it works
- E-commerce businesses use online platforms, such as websites, mobile apps, or online marketplaces, to sell their products or services.
-
- Customers can browse and purchase products or services online.
-
- E-commerce businesses can collect valuable consumer data.

Types of e-commerce

- Business-to-business (B2B): Transactions between businesses, where a supplier sells in bulk
- Business-to-consumer (B2C): Transactions where a business sells its product directly to a customer
- Cross-border e-commerce: International e-commerce transactions

Benefits of e-commerce Convenient and accessible for consumers, Potentially low start-up costs for operators, Broadens reach of businesses, and
